Web Development

I would like to express my interest in specialized development positions where my technical proficiency can be utilized to its fullest potential. I am excited to actively participate in the entire lifecycle of web development, from planning to implementation.

Education — *Bachelor's in Software Engineering*

Started at February - 2023

My Technical Skills: Typescript • Javascript • React.js • Tailwind.css • Java • Node.js • Git • Linux • REST API • Docker • Next.js

Kost, Ltda — *Front-end Developer Jr.*

September - November (2 Months)

I assisted in web development, focusing on Front-end planning for websites and studying technologies such as JavaScript, TypeScript, and React.js, as well as responsive design. Additionally, I briefly supported the marketing area with strategy development, data analysis, and result evaluation.

React.js • JavaScript • TypeScript

Voluntary work at Technical Maintenance— *Tech Assistant*

Maio 2018 - Janeiro 2019 (8 meses)

I performed several functions, from customer service to assistance in Technical maintenance, management and control of orders with Excel, also helping to resolve technical problems with both hardware and software.

SUCCESS CASE

Automation of Data Verification

I efficiently revitalized the expiration date management sector by integrating Google Sheets with Gmail using JavaScript. This integration provided automation that generates daily alerts, contributing to a more effective overall sector management. This eliminated the need for manual verification by many individuals, saving time and resources.
